Do you think the population just stays the same here in Swift County? Think again. While the total number of people stays generally the same, enough people are moving IN to the county to make up for the loss of the 18-25 year old youth! This “brain gain” is a different take on how our rural population is changing. **What *are* we doing about it? What *can* we do about it?** Our speaker, Ben Winchester, is a Research Fellow with the University of MN, Extension Center for Community Vitality.
